ADMIRAL CT SERIES SEATS

with

ComforTEK™

THE SEAT THAT WILL HELP YOU KEEP YOUR COOL

- The Admiral CT features our ComforTEK seat ventilation system. While not a full air conditioner, this system circulates air in the cushion and back area to help keep you cooler and more comfortable. This means you can run your AC system less - which could save you money in fuel and wear and tear. Oh and it just feels great.
- The HP air suspension of the Admiral series helps you run longer by reducing the strain on your body by absorbing the vibration from the vehicle. The HP performed better than 7 competitors at reducing this vibration.
- Our exclusive BackCycler system is designed to help you maximize your uptime by reducing the strain, pain, and fatigue back pain causes.
- A multitude of adjustment features come standard on the Admiral. Coupled with the larger seat structure in the industry, it adds up to more room, better fit, solid support and overall comfort for you.

'My back used to tell me when I was done for the day. Now I can last as long as my logbook will allow and I still have energy to spare.'

quote from driver about BackCycler made to

BackCycler®

Exclusive ComforTEK seat ventilation AND heating system - no matter the weather it is covered

Two map pockets on the cushion (one on each side) & rear magazine pocket

Larger seat - Overlay above shows Captain upper on top of Admiral upper

180° driver or passenger swivel

The Admiral CT brings it all to you. Cooling, heating, back pain relief, reduced vibration, more seat, and an amazing number of adjustments so it fits your body to give you the best support.

Comfort isn't just a feel good proposition. When you are in pain or fatigued you are able to work less and are less productive when you do work. That means lost revenue.

Invest in yourself.

PART NUMBERS	Driver Base PN	Passenger Base PN
Without armrests	40149.0xx	40179.0xx
With dual long 17" armrests	40149.3xx	40179.3xx

Complete base number above with material & color code below

"At Celadon several of our drivers have commented on the innovation of the BackCycler feature stating that they feel less fatigue at the end of the day and are also able to drive the full day without back pain compared to past seating choices. When drivers offer information like this without being asked, we then know that we have made a good choice for them."
