

The Commercial Vehicle Group (CVGI) is a global leader in commercial vehicle system solutions for the heavy-duty truck, construction, agricultural, industrial, marine, and specialty industries. We take pride in building products the same way that we've built our company – with commitment, strength and focused direction.

We're successful because we are committed to continuous improvement. We aren't afraid to take chances with modern processes that may improve the tried and true. We are immersed in technology in every market we serve. We're growing, penetrating emerging markets, and constantly in pursuit of innovation that will improve, shape, and define the future of the global commercial vehicle industry.

With locations across the United States as well as internationally our career prospects offer exciting growth opportunities. Please visit our website at www.cvgrp.com for more information about the company.

We are currently seeking an experienced Process/Production Engineer to assist us in furthering our growth through improvement and innovation at our facility in DeKalb, Illinois.

As the Process/Production Engineer, the incumbent will:

- Process customer blueprints for use in quoting/building heavy construction & military electrical harnesses and panel assemblies.
- Support production team by providing technical support for assembly challenges & continuous improvement lean manufacturing projects.
- Create build documentation from customer prints which include bill of materials, mylar layout, labor standards, inspection documentation & special instruction forms for various assembly departments.
- Communicate technical concepts to customers, suppliers, vendors and manufacturing personnel regarding questions or clarifications.
- Work with the Quality team on PPAP submissions using customer prints and AutoCAD layouts.
- Update bill of materials in Oracle form production change requests.
- Work in custom programs on continuous improvement projects to both production and engineering processes so that efficiency and accuracy can be increased utilizing AutoCAD, Harness Control, Oracle, Excel & ProE.

Requirements:

- One year certificate from college or technical school; or three to six months related experience and/or training; or equivalent combination of education and experience.

- Experience in electrical wire harness design/manufacturing preferred.
- Knowledge of Microsoft Office Products (Outlook, Word, Excel)
- Proficient in use of AutoCAD

There is no sponsorship offered for this position at this time.

Our eligible associates enjoy competitive wages and benefit package including comprehensive medical, dental, vision, 401(k) plan, company paid life insurance, paid holiday and vacation time off.

Resumes may be submitted as directed below. Include Job Title in all submissions.
